3.0 CONTROL OF THE QUALITY MANUAL

Only controlled copies of Quality Manual are distributed with the latest revision number. The master copy is available for reference with the Management Representative. The MR controls all copies of the QM, including all revisions and amendments.

This Quality Manual becomes a controlled document after the authorised signatories sign the document (MR and D/P). The making of unauthorized alterations and/or copies is not permitted. The MR can make any amendments to the Quality Manual only after authorization and approval from the D/P. MR will make revisions to this Manual and its associated documentation.

If any change or alteration is done to this Quality Manual or to any associated documents or text of any page at any particular time, a new revision number will be issued to the relevant page or section. Each revision is introduced by issuing a new page or pages.

The nature of the amendment and the date of revision will be indicated in detail in the Amendment Record Sheet of this Quality Manual.

If any change is done to the associated documents of this manual such changes or amendments are indicated in Amendment Record Sheet maintained for those documents & the relevant revision number is indicated in the **Master List** of documents.

All electronic copies of Quality Manual and other related documents are available in the Web for reference. Such documents are controlled as per the document and data control procedure.
